WORKING AT ITER

The ITER Organization brings together people from all over the world to be part of a thrilling human adventure in southern France—building the ITER Tokamak. We require the best people in every domain.

In a high pressure environment, we offer challenging full time assignments in a wide range of areas and encourage applications from candidates with all levels of experience, from recent graduates to experienced professionals. Applications from under-represented ITER Members and from female candidates are strongly encouraged as the ITER Organization supports diversity and gender equality in the workplace.

Our working environment is truly multi-cultural, with 29 different nationalities represented among staff. The ITER Organization [Code of Conduct](#) gives guidance in matters of professional ethics to all staff and serves as reference for the public with regards to the standards of conduct that third parties are entitled to expect when dealing with the ITER Organization.

The south of France is blessed with a very privileged living environment and a mild and sunny climate. The ITER Project is based in Saint Paul-lez-Durance, located between the southern Alps and the Mediterranean Sea—an area offering every conceivable sporting, leisure and cultural opportunity.

ITER VALUES AND COMPETENCIES

Each staff member working at ITER is required to maintain a strong commitment to the implementation and perpetuation of the ITER Safety Program, ITER values (Trust; Loyalty; Integrity; Excellence; Team mind set; Diversity and Inclusiveness) and Code of Conduct.

As a nuclear facility, ITER's core technical competencies of 1) Nuclear safety, environment, radioprotection and pressured equipment 2) Occupational Health, safety and security 3) Quality assurance processes, will be acquired through on-board training at a basic level for all ITER staff members.

E-RECRUITMENT SYSTEM CHANGE

The new e-recruitment system is currently implemented.

If you had an account and/or historic application in the obsolete e-recruitment system, please note that it was NOT transferred over to the new one.

If you wish to be considered for ITER opportunities in the future, please create your profile in this new platform by clicking [here](#).

ITER Organization staff will apply through internal career site in SuccessFactors portal (link on ITER BIZZ portal).

During this period of e-recruitment system change and given both the numerous applications received and high number of recruitments in progress, the recruitment process timeframe as specified in the FAQs is only indicative and there may be some delays until the new system is fully in place.

We thank you for your understanding and continuous interest in the ITER Project.

If you have any specific issue, please send an email to HR-Techsupport@iter.org.

IMPORTANT INFORMATION

ITER Organization staff will apply through internal career site in SuccessFactors portal (link on ITER BIZZ portal).

Application deadline: 01/12/2019
Domain: Construction
Department: Machine Construction
Division: Not Applicable
Section: Machine Assy. Planning & Contract Mgmt.
Job Family: Line Management
Job Role: Section Leader
Job Grade: P5
Language requirements: Fluent in English (written & spoken)
Contract duration: Up to 5 years

Purpose
As Machine Assembly Planning & Contract Management Section Leader, you will develop and implement holistic, mid to long-term, contract management and planning support to the Tokamak Machine assembly major construction contracts. This role maintains current major construction contract execution strategy and coordination across the department, and manages arbitration if necessary. Provides strategic views in support of the Machine Construction Department Head, and leads the implementation of critical decisions.

Background
Machine Assembly Planning and Contract Management (MPCM) section leader works directly with the Head of Machine Construction Department (MCD) specific to contract management and planning support to Machine Assembly. This section leader will be responsible for providing transversal support, including implementation of MCD decisions. Reporting directly to the MCD Head, this role will partner with all stakeholders in MCD, Plant Construction Department (PLD), the Construction Management Office (CMO), the ITER Project Control Office (PCO), and the Procurement and Contracts Division (PCD).

Major Duties/Roles & Responsibilities

- Supports and develops strategic planning of the activities within the MCD department, and identifies actions necessary to ensure smooth execution of the major Tokamak Machine Assembly and Tokamak Complex construction;
- Oversees coordination and execution of the contracts from strategy through implementation, providing arbitration as needed, via the Construction Contract Managers within the MCD;
- Implements and develops the Project Management culture within the organization, and reinforce Safety first, Quality first culture aligned with Project strategy;
- Manages staff members of the Section and supervises properly the activities of the team;
- Collaborates closely with Plant Construction Department (PLD) and Construction Management Office (CMO) to ensure coordination within the Construction Domain (CNST);
- Interacts with the Project Control Office (PCO) and the Procurement and Contracts Department (PCD) to sustain efficient contract management process;
- Proposes the budget, staffing, decision making packages, negotiation tactics, risk and opportunity management, organizational support, evolution of processes and procedures, specific to increase the efficiency in leading and managing activities consistently with managerial decisions;
- May be requested to be part of any of the project/construction teams and to perform other duties in support of the project;
- May be required to work outside ITER Organization reference working hours, including nights, week-ends and public holidays.

Measure of Effectiveness

- Develops, adapts, and maintains high standard quality & efficiency of contract strategy in MCD;
- Drives achievement of contract objectives to quality, within schedule and cost;
- Improves and strengthens project management and contract management culture within the MCD through influence and results;
- Demonstrates excellent communication competencies with various stakeholders;
